Dear Sir:

I would like to apply for a research award from your institute. The title of my proposal would be: "Genetic control of high density and low density lipoproteins as a function of diet among inbred mice susceptible and resistant to atherosclerosis". The budget would be approximately \$60,000 and cover costs of mice, isotopes for recombinant DNA work and the salary of a technician and lab helper. An abstract of the proposal is enclosed which indicates my specific aims, significance, methods and anticipated results. If this abstract is acceptable, please send me appropriate application forms.

Thank you for your consideration.

Sincerely,

Renee LeBoeuf
